EXPERIENCE

Data Engineer

Jan 2026 – Sep 2026

Capgemini | Client: Major Financial Institution (Bank Merger Integration)

- Built and maintain Ab Initio graphs for account validation with automated email alerting; developed Python/Shell tooling deployed via Control-M to generate migration reports from AWS S3 buckets, documented on GitHub.
- Maintain critical pipeline reference files and create Data Movement Layouts (DMLs) for onboarding new data feeds, validated end-to-end through account/control validation and Ab Initio parsing.
- Developed automated variance-reporting and file-transfer scripts to flag abnormal ingress volume and manage file movement between S3 buckets.
- Provide overnight coverage and pipeline updates during migration events across Control-M, GitHub, Ab Initio, Python, Shell, and AWS.

PROJECTS

Card Management System (Java Developer)

Capgemini | Internal Project

- Delivered a Java Spring Boot application as part of a team to securely manage card data and customer profiles, including identity verification and automated business rule enforcement.
- Built a dual-layered Basic Auth + JWT Bearer authentication pipeline for stateless, horizontally scalable session management, plus a custom validation engine and global exception handler for consistent business rule enforcement.
- Followed a Controller-Service-Repository architecture with DTO/Mapper patterns and a PostgreSQL database layer, documented via Swagger/OpenAPI.

EDUCATION

University of Illinois at Urbana-Champaign

Aug 2024

Bachelor of Science in Computer Engineering — GPA: 3.48/4.00

- Relevant Coursework: Data Structures & Algorithms, Numerical Methods & Analysis, Probability & Statistics, Database Systems, Computer Systems Engineering
- Honors & Awards: Engineering Visionary Scholarship, Motorola Solutions Foundation Pathways Scholarship

CERTIFICATIONS

- AWS Certification (in progress)
- Claude AI Certification (in progress)

SKILLS

Languages: Java, Python, C++, C, SQL, Shell Scripting

Data & Cloud: Ab Initio, AWS S3, AWS Console, Control M, Data Migration & Validation, ETL Pipelines

Frameworks & Tools: Spring Framework, Spring Boot, Hibernate, PostgreSQL, MySQL, Gradle, Git, GitHub, Docker, MongoDB, Postman, JUnit

Core Competencies: RESTful API Development, Object-Oriented Programming, System Design, Report Automation, Incident Monitoring
